Should Fix:

Reduce server response time

In our test, your server responded in 0.40 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 8 blocking script resources and 10 blocking CSS resources. This causes a delay in rendering your page.

Mobile

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 3.2KiB (19% reduction).

- Minifying <https://gokmen.net/wp-content/themes/teknobitv3s/style.css> could save 2.6KiB (19% reduction) after compression.
- Minifying <https://gokmen.net/wp-content/themes/teknobitv3s/css/responsive.css> could save 297B (16% reduction) after compression.
- Minifying <https://gokmen.net/wp-content/themes/teknobitv3s/css/owl.theme.css> could save 200B (33% reduction) after compression.
- Minifying <https://gokmen.net/wp-content/themes/teknobitv3s/css/owl.carousel.css> could save 122B (23% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 653B (17% reduction).

- Minifying <https://gokmen.net/wp-content/plugins/contact-form-7/includes/js/scripts.js?ver=5.1.7> could save 653B (17% reduction) after compression.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually

Mobile

indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 6% of the final above-the-fold content could be rendered with the full HTML response.
- Click to see the screenshot with only the HTML response: [snapshot:19](#)
