PageSpeed Insights

Mobile

82 / 100 Speed

⚠ Consider Fixing:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

Avoid landing page redirects for the following chain of redirected URLs.

- http://opdu.biz/

- http://opdu.biz/chat

- http://opdu.biz/chat/

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

Minify CSS for the following resources to reduce their size by 264B (11% reduction).

- Minifying http://opdu.biz/chat/css/vista1.css?1557472437 could save 264B (11% reduction) after compression.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Optimize CSS Delivery of the following:

- http://opdu.biz/chat/css/vista1.css?1557472437

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 26.3KiB (91% reduction).

- Compressing http://opdu.biz/chat/css/img/bar_vista1.png could save 15.1KiB (98% reduction).

- Compressing http://opdu.biz/chat/css/img/setting.png could save 2.7KiB (87% reduction).

- Compressing http://opdu.biz/chat/css/img/jurnal.png could save 2.7KiB (86% reduction).

- Compressing http://opdu.biz/chat/css/home.png could save 2.7KiB (89% reduction).

- Compressing http://opdu.biz/chat/css/img/guest.png could save 2.7KiB (87% reduction).

- Compressing http://opdu.biz/chat/css/img/bar_vista1.gif could save 292B (50% reduction).

Mobile

- Compressing http://opdu.biz/chat/img/android.png could save 122B (19% reduction).

Mobile

98 / 100 User Experience

⚠ Consider Fixing:

Configure the viewport

Your page uses an XHTML Mobile doctype declaration, which instructs browsers that your page is optimized for mobile and should render properly on all devices.

If you change the doctype, for example to <!DOCTYPE html> in order to use HTML5 features, configure a viewport with <meta name=viewport width=device-width> to keep the page's current behavior.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target <input type="text" name="npass"> is close to 1 other tap targets final.

- The tap target <input type="submit"> is close to 1 other tap targets final.

✔ 3 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of avoiding plugins.
